CONTENTS OF VOLUME 10

NUMBER 1

ORIGINAL RESEARCH ARTICLES

A Multivariate Principal Component Regression Analysis of NIR Data
J. Sun 1

Rank Determination and Analysis of Non-Linear Processes by Global Linearizing Transformation
M. M. C. Ferreira, W. C. Ferreira, Jr and B. R. Kowalski 11

Frameworks for Latent Variable Multivariate Regression
A. J. Burnham, R. Viveros and J. F. MacGregor 31

Multiway Calibration. Multilinear PLS
R. Bro 47

Two New Algorithms for Resolution of Two-way Data
J. Xu, Z. Guo, Y.-Z. Liang and R. Yu 63

NUMBER 2

QSAR Special Issue

Editorial 77

QSARs for Oxidation of Phenols in the Aqueous Environment, Suitable for Risk Assessment
E. Rorije and W. J. G. M. Peijnenburg 79

Single and Domain Mode Variable Selection in 3D QSAR Applications
U. Norinder 95

Multivariate Characterization of Molecules for QSAR Analysis
P. Goodford 107

Evolutionary Variable Selection in Regression and PLS Analyses
H. Kubinyi 119

Comparative QSAR Study on Hydroxyl Radical Reactivity with Unsaturated Hydrocarbons: PLS versus MLR
Ž. Medven, H. Güsten and A. Sabljić 135

Classifying Environmental Pollutants. 2: Separation of Class 1 (Baseline Toxicity) and Class 2 ('Polar Narcosis') Type Compounds Based on Chemical Descriptors
H. J. M. Verhaar, E. Urrestarazu Ramos and J. L. M. Hermens 149

The Evolutionary Transition from Uracil to Thymine Balances the Genetic Code
J. Jonsson, M. Sandberg and S. Wold 163

Ultraviolet Absorption Characteristics and Calculated Semi-empirical Parameters as Chemical Descriptors in Multivariate Modelling of Polychlorinated Biphenyls
P. Andersson, P. Haglund, C. Rappe and M. Tysklind 171

NUMBER 3

Editorial 187

Discriminant Analysis with Singular Covariance Matrices. A Method Incorporating Cross-validation and Efficient Randomized Permutation Tests
P. Jonathan, W. V. McCarthy and A. M. I. Roberts 189

Local Centering in Multivariate Calibration
A. Lorber, K. Faber and B. R. Kowalski 215

A Random Number Experiment to Simulate Resample Model Evaluations
P. P. Mager 221

A Non-linear Mapping-based Generalized Backpropagation Network for Unsupervised Learning
J.-H. Jiang, J.-H. Wang, Y.-Z. Liang and R.-Q. Yu 241

Network Training and Architecture Optimization by a Recursive Approach and a Modified Genetic Algorithm
J.-H. Jiang, J.-H. Wang, X.-H. Song and R.-Q. Yu 253

BOOK REVIEW 269

CONFERENCE ANNOUNCEMENT 271

NUMBER 4

Automatic Window Factor Analysis—a More Efficient Method for Determining Concentration Profiles from Evolutionary Spectra
E. R. Malinowski 273

Non-linear Discriminant Feature Extraction Using Generalized Back-propagation Network
J.-H. Jiang, J.-H. Wang, X. Chu and R.-Q. Yu 281

Detection of Linear Substructures in Calibration Model by Robust Approach: Maximum Sum of Binary-coded Residuals (MASBR) Regression
J.-H. Wang, J.-H. Jiang and R.-Q. Yu 295

Pattern Recognition Analysis and Classification Modeling of Selenium-producing Areas
D. L. Naftz 309

Fuzzy Cluster Analysis by Simulated Annealing
L.-X. Sun and K. Danzer 325

LABORATORY PROFILE 343

BOOK REVIEW 349

NUMBERS 5 & 6

Papers presented at the 4th Scandinavian Symposium on Chemometrics held in Lund, Sweden, June 1995

Guest Editor: Torbjörn Lundstedt

Multivariate Quality Assessment of Aged RP-HPLC Columns
A. Bolck, A. K. Smilde, K. A. A. Duineveld and P. M. J. Coenegracht 351

Ruggedness Test of An Aqua Regia Extraction Method Made with the Geochemical Reference Material GXR-2
C. Backman and N. Gustavsson 371

Synthesis and Optimization of 1-Pyrrolemethane Sulfonate by Means of Experimental Design
P. M. Andersson, T. Lundstedt and L. Abramo 379

Fast Screening of Large Databases Using Clustering and PCA Based on Structure Fragments
J. Nouwen, F. Lindgren, B. Hansen, W. Karcher, H. J. M. Verhaar and J. L. M. Hermens 385

Compression of First-Order Spectral Data Using the B-Spline Zero Compression Method
R. J. O. Olsson, M. Karlsson and L. Moberg 399

PCA and PLS Methods Applied to Ecotoxicological Data: Ecobalance Project
S.-P. Mujunen, P. Minkkinen, B. Holmbom and A. Oikari 411

Partial Linear Fit: a New NMR Spectroscopy Preprocessing Tool for Pattern Recognition Applications
J. T. W. E. Vogels, A. C. Tas, J. Venekamp and J. van der Greef 425

QR-PLSR: Reduced-rank Regression for High-speed Hardware Implementation
F. Westad, K. Diepold and H. Martens 439

Data Laundering by Target Rotation in Chemistry-based Oil Exploration
O. H. J. Christie 453

Hierarchical Multiblock PLS and PC Models, for Easier Model Interpretation and as an Alternative to Variable Selection
S. Wold, N. Kettaneh and K. Tjessem 463

Multivariate QSAR Modelling of the Rate of Reductive Dehalogenation of Haloalkanes
L. Eriksson, H. H. Verboom and W. J. G. M. Peijnenburg 483

A Multivariate Characterization of tRNA Nucleosides
M. Sandberg, M. Sjöström and J. Jonsson 493

Screening Method for Metals Based on Array Spectrophotometry and Multivariate Analysis
E. Engström and B. Karlberg 509

Model Validation by Permutation Tests: Applications to Variable Selection
F. Lindgren, B. Hansen, W. Karcher, M. Sjöström and L. Eriksson 521

3D-QSAR Investigation of the Tripos Benchmark Steroids and Some Protein-Tyrosine Kinase Inhibitors of Styrene Type Using the TDQ Approach
U. Norinder 533

Extreme Value Theory and its Potential Role in Chemometrics: an Introduction
P. Geladi and J. L. Teugels 547

The AMT Approach in Chemometrics—First Forays
K. H. Esbensen, K. H. Hjelmen and K. Kvaal 569

Multivariate Calibration Models Using NIR Spectroscopy on Pulp and Paper Industrial Applications
H. Antti, M. Sjöström and L. Wallbäcks 591

Non-linear Modelling with a Coupled Neural Network—PLS Regression System
G. Andersson, P. Kaufmann and L. Renberg 605

Spectral Resolution and Prediction of Slit Widths in Fluorescence Spectroscopy by Two- and Three-Way Methods
L. Nørgaard 615

Estimation of Hammett Sigma Constants from Calculated Atomic Charges using Partial Least Squares Regression
P. Genix, H. Jullien and R. Le Goas 631

Experimental Design and Priority PLS Regression
A. Höskuldsson 637

Multivariate Statistical Process Control; Example from the Chemical Process Industry
T. E. Morud 669

Use of Correspondence Analysis Partial Least Squares on Linear and Unimodal Data
J. C. Frisvad and M. Norsker 677

Error Estimation in PLS Latent Variable Structure
R. E. Kleinknecht 687

Indirect Measurement of Key Water Quality Parameters in Sewage Treatment Plants
H. A. Blom 697

CONFERENCE ANNOUNCEMENTS 707
